

Reproducible Results on Clustering MIRC TFS

- ❖ **Source Code Author:** Sungmin Script for MIRC Data on Jupiter Python
- ❖ **Modified to Reproduce the results:** Pradeep for MIRC Data on raw python

Scree Plot Results to validate Accuracy

Dendrogram to visualize the Cluster results

Dendrogram to visualize the Cluster results

=====CLUSTER 5=====

['portal vein => vein => segment of venous tree organ => region of vascular tree => organ segment => organ region => cardinal organ part => anatomical structure => material anatomical entity => anatomical entity => ']
['shunt => flow disorder => mechanical disorder => pathophysiologic finding => **clinical finding** => ']
['liver => lobular organ => parenchymatous organ => solid organ => organ => anatomical structure => material anatomical entity => anatomical entity => ']
['thrombosis => mechanical disorder => pathophysiologic finding => **clinical finding** => ']
['congenital => disease origin descriptor => Radlex descriptor => ']
['blood => portion of body fluid suspension => portion of body fluid => portion of body substance => material anatomical entity => anatomical entity => ']

=====CLUSTER 6=====

['right => laterality => location descriptor => Radlex descriptor => ']
['congenital => disease origin descriptor => Radlex descriptor => ']
['heart => organ with cavitated organ parts => cavitated organ => organ => anatomical structure => material anatomical entity => anatomical entity => ']
['increased => status descriptor => Radlex descriptor => ']
['obstruction => flow disorder => mechanical disorder => **pathophysiologic finding** => clinical finding => ']
['heart disease => cardiovascular disorder => body-system-specific disorder => **pathophysiologic finding** => clinical finding => ']

Work Completed: Reproduces the TF results

Work in Progress: Results validation

Work Planned for next two days:

1. Understanding the Results obtained
2. Understanding the Python code written for MIRC

Work Planned for Next Week:

1. Work towards the comments received from meeting

Thank You!
